Henna and Ayurvedic Herbs at Henna Sooq

Henna: This herb is used to color the hair orange-reddish tones, and covers grey. It strengthens, conditions, protects hair, softens it, and adds shine to your hair. Henna also gets rid of dandruff.

Cassia: This will give you all the benefits of henna, and also yields golden tones on light, and grey hairs.

Indigo: Used along with henna to color hair reddish-brown, brown, chocolate brown, and up to black tones.

Amla: This powder is great for promoting hair growth, maintaining your curl pattern, adding volume, and toning down the red tone of henna.

Soapnuts: Naturally cleanses your hair when made into a liquid (it also has many uses).

Shikakai: An herb used to help cleanse your scalp, hair growth, and creating a healthy environment in your scalp.

Maintaining a Natural & Healthy Hair Regimen

When beginning your natural hair regimen, you'll first choose the appropriate herbs that will work for your needs. Once you have that part of your regimen established, you'll also have to balance the herbs with natural hair oils, and shampoo bars.

As herbal hair treatments can be drying for some, it is very important to choose a moisturizing hair oil that will suit your hair type. Our hair oils are cosmetic grade, and can also be used on your skin.

Our shampoo bars are perfect for naturally washing your hair, and scalp. They are superfatted with rich oils so that your hair gets back the moisture it lost from the henna, and herbs. Our bars are specially formulated with the right ingredients for every hair type. They are handmade, and 100% natural.
